Work Experience

12/2009 - 06/2013 — Maringa, Brazil
Software Engineer
investor$Tec @ investor$Inc (personal project)
Real State Management Software for an international real estate advisory company.

Tasks/Achievements
- Displayed a really full stack role, from requirements gathering and project management to coding, deployment and server administration.
- Achieved fully continuous integration and continuous deploy environment with Bitbucket, Codeship and Heroku with virtually 100% app uptime.
- Managed many project challenges, such as cloud databases and large files and images uploads to the cloud (over 18k images).
- Automated several marketing processes such as brochure generation and homes images manipulations.
- Developed a REST API to integrate data to different websites.

Contact: Leandro Teles - teles@investorsinc.com.br

08/2014 - Present — Maringa, Brazil
Software Engineer
Objective Solutions
http://www.objective.com.br/

Tasks/Achievements
- Participated in the development and maintenance of a large CRM & Billing system with Java and internal frameworks.
- Worked with several satellite systems with different technologies such as Javascript, JSF, and HTML/CSS.
- Took the initiative to change technologies of a JSF project to AngularJS, meeting client's tight deadlines and budget.
- Teached AngularJS and Spring to the other team members.
- Member of a development team with strong agile practices such as SCRUM, pair programming, code review, CI, XP and Kanban.

06/2013 - 08/2014 — Maringa, Brazil
Senior Java Developer
DB1 Global Software
http://www.db1.com.br

Tasks/Achievements
- Participated in outsourcing projects, with Java, defining architecture, programming, delegating tasks and keeping follow-ups with other programmers.
- Automated several HR internal processes by making surveys, analysing processes and developing a software to help HR do things faster and easier.
- Worked as a SCRUM Master of the development team and performed tasks of lesser complexity inherent in project management.
- Participated in an innovation project conducted internally with "My Loyalty Card".
